LEGAL ADVISER:
H. B. WILKINSON, Esq.

THIS Company has been formed for the purpose of carrying on the business of Cotton Spinning and Weaving at Shanghai.

It is intended that the business should at first be confined to spinning the original equipment for which will be not less than 40,000 Spindles.

With Building and Machinery. Weaving Machinery will be added afterwards. Sufficient Engines and Boiler power for both purposes will be installed at the outset.

The Company proposes to import the most superior Machinery to acquire a suitable site, and to erect Mills for the manufacture of Cotton Yarns and Cloths best suited to the China market.

As is well known the importation of Machinery by Foreigners has hitherto been officially prohibited, but Chinese have been allowed to import Machinery under special permits, and Cotton Mills owned by them have been in successful operation for some years. As present Mills comprising about 200,000 Spindles are either working or in an advanced stage at this port alone.

Under the recently concluded Treaty between China and Japan, the restriction on the importation of Machinery has been removed, and this field of industrial enterprise is now open to Foreigners and Chinese alike.

It is confidently believed that there still exists an opening for more Cotton Mills here, and that their product is especially in demand in the East.

The Cotton Mills in Japan operate some 900,000 Spindles, a very large proportion of the output of which is exported to this country. The principal supplies of the raw material come from the United States and India.

The difference in cost of the raw material grown in China would favour the Mill in competition with those in Japan, to a very considerable extent.
